CENTRAL AIR CONDITIONING "Load Management"

**\$5 monthly credit
June, July, August**

I hereby apply for the Central Air Conditioning "Load Management" Program.

I agree to comply with the rules and regulations of Eau Claire Energy Cooperative and I understand any willful violation of the usage constraints will automatically cancel my application and the Central Air Conditioning credit will no longer be available to me. In the event that tampering is found, any credit given since the last inspection will be billed back to me.

Central Air Conditioning "Load Management"

This control strategy may be utilized during peak electrical demand periods. During these peak periods, the air conditioning may be cycled, 15 minutes on – 15 minutes off.

Signature of Applicant _____

Signature of owner is required if applicant is renting

Name: _____

Address: _____

Telephone: _____ Date of Application: _____

Installation of the necessary load-management equipment will be done by a representative of Eau Claire Energy Cooperative at no charge to you.

PLEASE PROVIDE THE FOLLOWING INFORMATION ABOUT YOUR CENTRAL AIR CONDITIONER:

BRAND: _____

MODEL #: _____

SIZE OF UNIT in Tons (If known): _____

WHAT IS CENTRAL AIR CONDITIONING

“LOAD MANAGEMENT”?

The central air conditioner at your home may be shut off during peak periods of electrical demand via a radio signal emitted from Dairyland Power Cooperative in La Crosse, Wisconsin. During those peak periods, your air conditioner may be cycled, 15 minutes on – 15 minutes off, in an effort to lower electrical demand. The load management equipment installed is not a time clock and control does not occur on a daily basis, only during peak demand periods.

- There is no charge for the “Load Management” hardware.
- You will receive a \$5.00 per month credit for each central air conditioner on the Load Management program during the months of June, July and August provided the kWh usage requirements are met. This credit is reviewed annually

Availability

Available under established rules and regulations for service to central air conditioners of Cooperative members subject to the following criteria:

Criteria:

- (a) The air conditioner must be a central system and not a window unit, wall unit, or mini-split system
- (b) Usage pattern must be such that the load can be cycled, 15 minutes on – 15 minutes off, during peak demand periods.
- (c) In order to connect an air conditioner to the load management program there must be disconnect at the air conditioner before we can install any load management equipment. If there is no disconnect and the member would like one installed the Cooperative will do so for a fee.
- (d) A monthly credit will be paid during the billing months of June, July and August when energy usage is 400 kWh or higher. For accounts with multiple air conditioners participating in the program 400 kWh must be used for each air conditioner in order to receive multiple credits. No credit will be received when monthly usage is below 400 kWh.
- (e) Necessary load management equipment will be installed and maintained by a representative of the Cooperative.
