Youth Ambassadors make a BIG difference

Whether it's working together on community service projects or touring local renewable energy facilities or learning about careers, our Youth Ambassadors make a difference.

Area high school students (grades 9-12) will explore electrifying energy issues plus stimulating co-op and youth leadership topics at monthly gatherings September through May. Students will also work together on rewarding community service projects. This all happens while making new friends and creating experiences to include

on your job and higher education resumes. Sign up at www.ecec.com and tell your friends.
