

Keep your cool this summer with energy efficiency rebates!

Here are some quick and easy ideas to getting your energy efficiency incentive and keeping your family cool this summer at the same time:

- Incentives ranging from \$40 to \$300/ton for central air conditioners and heat pumps. Additional incentives may be available through the Focus on Energy program.
- Incentives are in place through December 31, 2017 or until funds are depleted. Funds are limited so members are encouraged to install equipment and submit incentive forms as soon as possible.
- HVAC equipment must be purchased and/or installed in 2017 and installed on Eau Claire Energy Cooperative lines.
- Submit your documentation no later than 3 months after purchase and/or installation, or by December 31, 2017, whichever date comes first. Equipment purchased in 2017, but not installed until 2018 may qualify for a 2018 incentive, provided there is an incentive available at that time.
- Include a copy of your receipt or invoice for each item purchased.
- Submit required documentation to Eau Claire Energy Cooperative.

Looking for ways to keep your cool this summer?

Lower your energy bill at the same time!

Check into the HVAC (Heating, Ventilating & Air Conditioning) energy efficiency incentives available through Eau Claire Energy Cooperative and Focus on Energy. Here are some signals that could tell you your equipment is **NOT** energy efficient, and it's time for an upgrade:

1. Your AC equipment is unreliable.
2. Your equipment is over 15 years old.
3. You've noticed excessive noises, or sporadic pops, bangs, or rattles from your air conditioning unit.
4. It quits working during the hottest days when you most need it.
5. Your energy bills have gone up in the summer.
6. Your home is hot and uncomfortable in the summer.
