Worried about high electric bills?

Manage yours on the go with SmartHub – it's FREE!

Now you can easily view and manage your electric bill from your phone or other mobile device. Using you Apple or Android device, use SmartHub to see when you are using the most electricity. There may be easy ways to adjust your energy usage to reduce you electric bill.

1. Your very own usage chart shows when electricity is being used in your home or business.
2. Check the outdoor temperature overlay to see when hot summer days and the cold winter are demanding more electricity to keep your home comfortable. Using a programmable thermostat wisely can help manage energy use.
3. Go to www.ecec.com to see how you can save energy wisely, thus, reducing your energy usage and controlling your electric bill.
