

Sharing Success

Members will see rate credit for six months

While 2020 has been a year of many challenges, your cooperative is financially strong. Sales are higher than expected and expenses including the cost of power are down. Because we are a cooperative, the Board of Directors has taken action to return a portion of this success to you in the form of a credit.

- The credit will be applied to the power cost adjustment (PCA) line of your bill
- The credit will appear on the bills you receive in December through May

"After thoughtful consideration, it was very important to our Board of Directors that we get our members' money back to them."

- Board Chair Clarence "Butch" Boettcher
