Call before you dig.**

Details inside

DIGGERS  **HOTLINE**

READY TO START DIGGING?

What is 811?

811 is the national call-before-you-dig phone number. Anyone who plans to dig should call 811 or go to diggershotline.com before digging to request that the approximate location of buried utilities be marked with paint or flags so that you don't unintentionally dig into an underground utility line.

When do I call 811?

You should call 811 or use diggershotline.com at least 3 business days before you begin any digging, including common projects like planting trees and shrubs or installing fences and mailboxes.

What info do I need?

You will need to know the address of where you plan to dig, including the county and nearest cross street, as well as the type of project you're completing and the exact area on the property where you're planning to dig. Whether you call 811 or make your request online, you'll need the same info.

What do I do after?

You need to wait until utilities respond to your request and mark their services before breaking ground. Once all utilities have marked their buried lines, you should dig carefully around any utility marks and consider relocating projects that are close to buried utilities.

EVER WONDER...

“WHAT DO THE FLAG COLORS IN OUR YARD MEAN?”

Utility Location Color Code: Flags or paint in the following colors denote designated facilities

Red: Electric power lines, cables, conduit, and lighting cables

Yellow: Gas, oil, steam, petroleum, or gaseous materials

Orange: Communication, cable TV, alarm or signal lines, cables or conduit

Blue: Water, irrigation, and slurry lines

Green: Sewers and drain lines

Pink: Temporary survey markings

White: Proposed excavation
