YOUTH AMBASSADORS VISIT EAU CLAIRE HUMANE ASSOCIATION

By Adam Westaby

Eau Claire Energy Cooperative's Youth Ambassadors spent the month of April collecting donations for their Pet Supply Drive to support the Eau Claire County Humane Association. The students delivered the donations to the shelter, and received a tour from Executive Director Shelley Janke and Marketing & Development Director Addie Erdmann. The students were given a behind-the-scenes look throughout the shelter and gained a much better understanding of what it takes to care for so many animals. Our Youth Ambassadors also made a passionate plea for ECEC to have a "Youth Ambassador cat" added to the office—unfortunately, their petition was unsuccessful.

JUNE IS DAIRY MONTH!

Eau Claire Energy Cooperative employees visited Feed My People Food Bank this month. Taylor Skibba and Jeni Thorpe dropped by and made a donation on behalf of ECEC. The cooperative donated six gallons of milk, six pounds of butter, and various cheeses to help those in our community. In honor of June Dairy Month, many families in our area will have fresh dairy products added to their refrigerator. It is important to the cooperative to support those in our community and support our local farmers! As part of Cooperative Principle #7, concern for community, we take pride in supporting our community in any way we can. Thank you to all of our dairy farm members for working so hard to provide our communities with the best quality products around!

Delicious Dairy Facts About Milk

Got milk? Milk is the only food that you can survive on alone. It has every nutrient you need.

The world loves milk. The world's population consumes over 2.1 billion liters every day. That's enough to fill up 813 Olympic-size pools.

Cows have friends. Dairy cows are social animals. Like people, they will make friends and bond with some, while avoiding others.

Cows can produce a ton of milk. A cow turns grass into milk within two to three days. Depending on the breed, a cow can make between 25 and 40 liters of milk per day.

MAJOR CONSTRUCTION AT ECEC HEADQUARTERS

Anyone who has visited ECEC headquarters recently will have noticed the major renovations going on out back. Eau Claire Energy Cooperative is currently in the process of renovating our garage and warehouse spaces. As you can imagine, this is a large undertaking that is affecting our parking at the office, the storage of our equipment, and our daily operations. We ask that in this process, our members remain safe when visiting our office by not entering the construction area behind the building. Our lobby remains open and ready to serve you. Please don't hesitate to stop! We are available to answer any questions and give assistance to our members. We also ask that our members

be patient with noise or other construction-related delays when in our office. Your cooperative remains dedicated to providing you with safe and reliable power and we are continuing to make that a priority in the future.
